

M675i (675i) Expansion Module

Aastra 5i Series Expansion Modules Offer increased Call Control

The 675i expansion module is designed to increase the power and flexibility of the 5i Series SIP telephones. Up to three modules can be used with the 57i or 57i CT telephone to create a powerful, feature rich console option. The 675i shares power and signaling with the phone, eliminating the need for additional wiring. Designed for receptionists, administrative assistants, call center agents, power users, and executives who need to monitor and manage a large volume of calls on a regular basis, the 5i Series Expansion Modules provide an intelligent choice for all Enterprise IP environments.

Features

- **Backlit LCD Screen**
144x128 pixels graphical LCD display with 20 Softkeys with LED's and 3 hardkeys with LED's that provide access to three screen levels offering up to a total of 60 programmable keys.
- **Flexible Features**
The 675i is equipped with LED status indicators and supports a variety of programmable features including Line, Speed Dial, Busy Lamp Field, Bridged Line Appearance, Shared Call Appearance and Do Not Disturb.
- **Simplified Deployment**
Sharing both power and signaling with the 5i Series phone, the 675i can be easily added without additional installation or wiring expense. Simplified configuration via WebUI or configuration file from the phone.
- **Expandability**
Up to three 675i modules can be used with the 5i Series models 57i or 57i CT, offering up to 180 additional keys. Growing businesses can start with a single module and add more as their needs increase.
